

REMARKS

No amendments to the claims or specification are presently submitted and no new matter has been added. Claims 20-21 and 25-28 are currently pending.

OBJECTIONS TO THE DRAWINGS

The Examiner has noted that the figures reviewed by the Examiner do not adequately show the ratchet arm and biased flexible arm described in the specification. Applicant's undersigned representative discussed this problem with the Examiner and concluded that the originally filed color/shaded version of the figures was copied and electronically scanned and therefore not easily readable by the Examiner. **Figures 1A, 1B, and 1C** have been formalized in a black and white line format that replaces the originally color/shaded format to more clearly illustrate the depicted features. Applicant notes that the newly rendered versions of **Figures 1A, 1B, and 1C** do not include any new features that were not originally depicted in the figures submitted in the original application filing. Specifically, Applicant notes that **FIG. 1B** more effectively depicts the outline of the aforementioned features of ratchet arm **27** and biased flexible arm **22**.

Respectfully submitted,

Matthew W. Baca
